

Decoclean panels Protection panel

Applications

This wall protection has been especially developed for areas exposed to a high risk of infection in order to help in the fight against in-hospital illnesses and to reduce bacterial proliferation.

It is recommended for:

- Operating theatres
- Intensive care, transplant and serious burns wards
- Neonatology
- Central sterilisation
- All high infection risk areas, including those at Level 4 on the Pasteur scale.

Description

- Model: Decoclean panel
 - Standard panel dimensions: 3 m x 1.50 m
 - Custom options: cut to size, curved to pattern
 - Thickness: 2 mm
 - Material: Class-0 fire-rated PVC, solid colours
 - Surface finish: smooth
 - Fixing: Adhesive bonding with Gerflor acrylic glue.
- Joints between panels are made using a hot-melt compound or a silicone jointing compound, colour matched to the range.
- Colours: 5 standard

Description text:

Description: To supply and install a protective panel (such as Gerflor's Decoclean) in rigid PVC, M1 fire rated and solid coloured. Its surface is to be smooth. Its length is to be 3m, width 1.5m and thickness 2mm.

No heavy metals are used in its manufacture and the calcium-zinc thermal stabilisation process is used.

- Colour: As required from the manufacturer's range
- Installation method: Using adhesives, as recommended by the manufacturer.
